

PaperCut 15

Outstanding SMB Print Management Solution

PaperCut[™]

PaperCut MF 15 and PaperCut NG 15 won BLI's Pick award for "Outstanding SMB Print Management Solution" for the Summer 2015 test season for their...

- Unrivaled ease of installation, configuration and use for IT personnel tasked with deployment and ongoing administration of the platform
- Complete print management feature set including usage tracking, cost accounting, quotas and available billing/cost recovery
- Easy-to-implement print policies that help cut down on wasteful printing, reduce costs and bolster "green" initiatives in an organization
- Unmatched affordability for a full-featured print management solution

Understanding print output—and its associated costs—is critical for schools and businesses today. PaperCut facilitates usage tracking and charging for output when appropriate, and includes convenient, money-saving features such as secure print release, rerouting of files to lower-cost devices, and the ability to enforce duplex printing or restrict output by application type.

"One of PaperCut's greatest advantages is how easy it is for IT staff to administer," said Jamie Bsales, BLI's senior editor for solutions. "The logically arranged menu items and handy Dashboard make administering a PaperCut system much easier than working with other print management offerings BLI has tested, even for those who have never used a print management system. And compared with the competition, PaperCut is very attractively priced. These attributes make it especially well-suited for small and medium-sized businesses where IT resources and budgets are already stretched thin."

“At PaperCut, we work hard to bring easy-to-use print management solutions to businesses of all sizes. Small and medium business owners can quickly get the cost savings and the security benefits of PaperCut, without the large enterprise installation,” said Chris Dance, CEO of PaperCut Software. “PaperCut software works on any platform—Windows, Mac, Linux and Novell—and integrates with the majority of printing and copying devices, giving the end customer the ultimate control and security in their print environment. Receiving the ‘Outstanding SMB Print Management Solution’ Pick award demonstrates our commitment to customers worldwide, delivering quality and rapid innovation, no matter how big or small.”

About **BLI Pick Awards**

Twice a year with its Pick awards, BLI gives special recognition to the hardware and software products that provided the most outstanding performances in BLI’s unique evaluations. Software solutions undergo an in-depth hands-on review that focuses on key attributes for a solution’s target market and compares how well the product stacks up against leading competitors. Pick winners rise above the competition in key areas such as value, feature set, ease of use, ease of administration, hardware compatibility, software integration, security and support. Software solutions earn an overall rating based on a five-star scale, and Pick contenders are culled from those that earn the highest ratings. Consequently, a BLI Pick is a hard-earned award that buyers and IT directors can trust to better guide them in their acquisition decisions.
