

What's new for Toshiba

PaperCut MF on Toshiba's next generation MDS platform delivers a simplified setup, revitalized user interface and seamless integrated scanning.

Unparalleled simplicity of setup on Toshiba MFDs

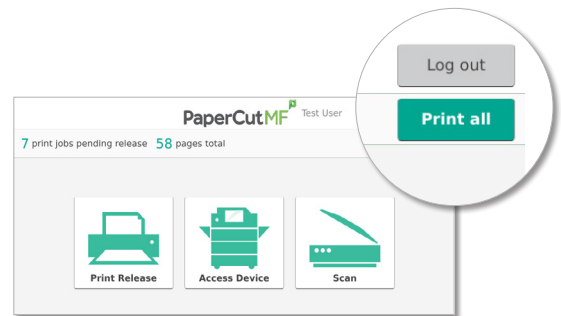

Setting up a Toshiba MFD has never been so easy. With the next generation Toshiba MDS platform, PaperCut MF can be installed and setup with just a few clicks.

Not only does this technology help eliminate the frustration of long and complicated installations, it saves time and money as technicians will now only need minutes to setup. System Administrators can pre-configure and deploy device, user or group specific Scan Actions all from the PaperCut MF web admin.

All-in-one intuitive user interface

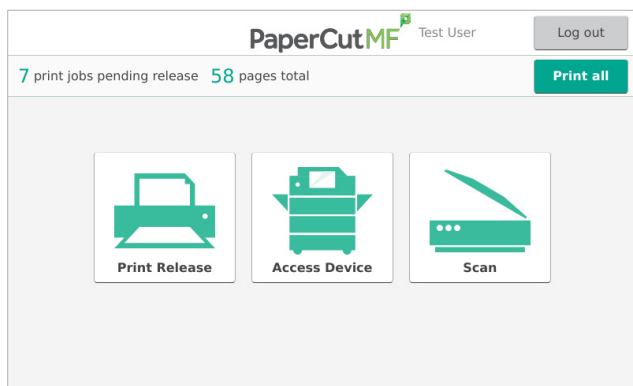

With the latest PaperCut MF design, the sleek, modern interface provides users with a consistent and user-friendly experience across all MFD functions.

Configured for optimal usability, common actions such as 'Print all' are available from the home screen for quick and easy access.

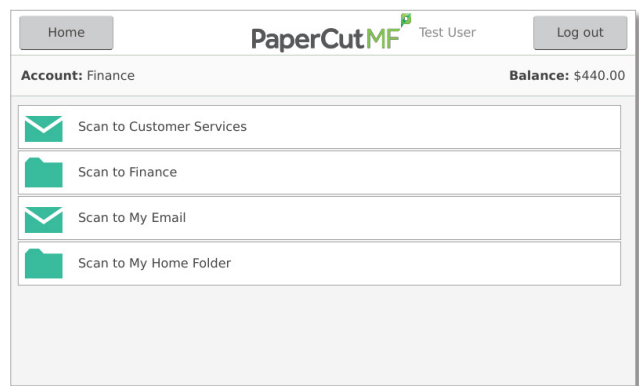

Integrated Scanning on PaperCut MF

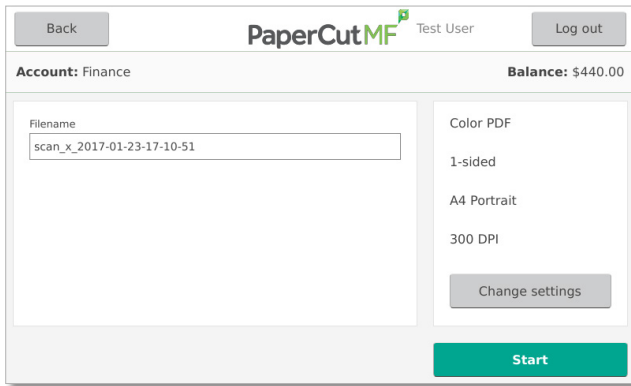

PaperCut MF's Integrated Scanning provides users seamless control of where and how their documents will be scanned to all within the one display. With user and group scanning permissions pre-configurable through the PaperCut MF web admin, users can quick and easily scan to authorized email and folder destinations.

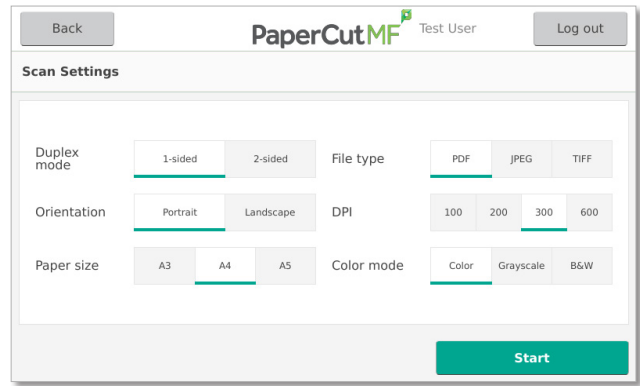

PaperCut MF Home Screen

Account selection for charging scan jobs

Scan destination and settings confirmation

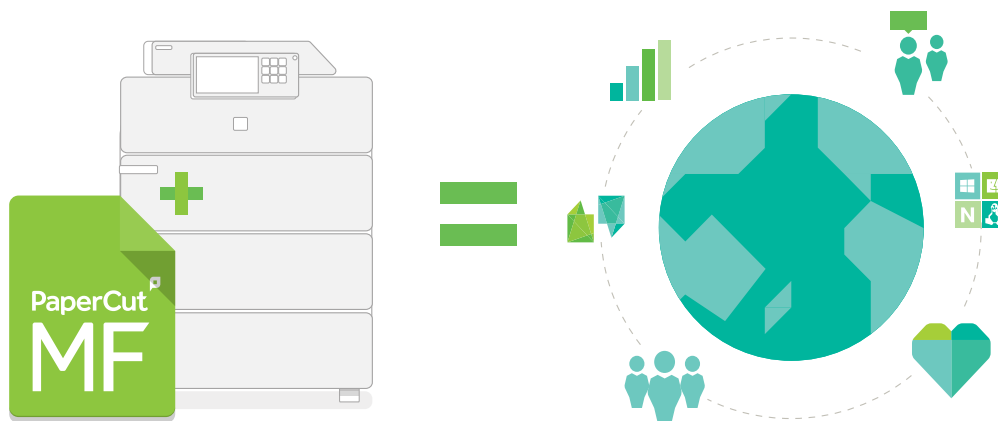

Scan Setting for full input / output control

Complete control over print, scan and fax

In addition to these latest features of PaperCut MF on Toshiba, PaperCut MF provides complete management of all environments. Suitable for sites of any size, PaperCut's solutions are currently in use in over 50,000 sites worldwide and translated into 20 languages. PaperCut MF is a simple, low cost embedded software providing:

- Convenience to print from any user device and operation system
- Versatile serverless printing
- Secure and high availability print management
- Enables tracking, control and secure print release directly from the device's panel
- Effortless scalability for organizations of all sizes
