

A CUSTOMER GUIDE TO PAPER CUT

Secure patient records to stay compliant & efficient in **healthcare**

Security and simplicity have been coded into PaperCut solutions for over twenty years (that's got to earn us a PhD, right?), so you can focus on the health of your patients, not your printers.

Challenge

Your highest priority is the well-being and safety of your patients. That extends beyond their physical health to protecting their Personal Health Information (PHI). With prescriptions, charts, wristbands, and referrals floating around, this can be a difficult area to control.

So if you have . . .

- ▶ lack of visibility and control over who can print what and where
- ▶ PHI leaving your site without any form of traceability
- ▶ the need for interoperability between your Electronic Medical Record (EMR) and printing systems
- ▶ a complex printing environment with a variety of printers and mobile devices
- ▶ confidential paperwork to fax to other clinics, departments, or even external pharmacies
- ▶ staff that require printing to just work

. . . PaperCut is the solution for you.

Integration with your EMR application

PaperCut interoperates with common EMR applications like Epic, Cerner, Allscripts, and many others. This means you can route print jobs to the right printer and tray, optionally hold that job for secure release, and track every job to a specific user to satisfy your compliance requirements.

One-of-a-kind compatibility

With the broadest range of print manufacturer integrations and operating system compatibility, PaperCut can scale to suit simple or complex environments.

We have federal laws relating to privacy. Secure Print Release and Find-Me Printing have really made stakeholders more confident in the level of security we provide.

Baptist Health Care, USA

Solution

PaperCut keeps your print environment healthy by adhering to industry-leading security practices. It also slots in seamlessly to make printing efficient, easy, and accessible in any location without disrupting staff's workflow.

Secure PHI to maintain compliance

PaperCut is compliant out of the box, offering solutions to address both electronic and physical EMR regulations. For printing, copying, and even faxing, PaperCut tracks and protects your documents, then job logs and audit trails enable you to trace all jobs back to their source. Secure Print Release ensures a job won't print until you authorize it at the device, so confidential patient information only releases into the right hands. And after printing, watermarking and digital signatures can identify who each page belongs to, altogether encouraging accountability.

Enable staff to work easier than ever

Since PaperCut takes a cross-platform and vendor-neutral approach, it works in any environment, giving the same experience on every multi-function device for ultimate efficiency. For doctors, nurses, and staff shuffling between departments, clinics, and campuses, PaperCut's Mobility Print enables their mobile devices – like tablets, smartphones, and laptops – to print with ease. Print Deploy also manages thousands of print queues across multiple sites, allowing you to replicate and push queues to users in the right location.

Plus, Scan to Fax streamlines and secures yet another workflow.

Support your present and future

PaperCut has extensive experience with large, complex organizations, and has scaled to over 4,000 printers and 1.2 million users. So wherever you are today and wherever your growth takes you in the future, we're confident to say, "We've got you!" We've built a global network of expert partners, working around the sun to provide you localized support – from initial setup and upgrades, to diagnosing issues – taking care of you, while you're taking care of patients.

Convenience that follows you

It's no secret medical professionals are strapped for time. They can't waste valuable minutes figuring out what printer to send a job to, or where their print job mysteriously disappeared to. That's where PaperCut's Find-Me Printing scrubs in. With Find-Me Printing, every print job travels with you, so you can avoid scrolling through a long list of available printers, and simply release at whichever is most convenient. To top it off, it simplifies the administration side of things by minimizing the number of print queues you need to manage.

Benefit

4 ways PaperCut enhances the print environment in healthcare organizations

1. Secure your printing from end-to-end so you can rest at ease.

2. Maintain compliance with confidentiality regulations of electronic and physical data.

3. Simplify printing so you and your staff can focus on what matters most.

4. Remove complexities for a variety of devices and printers across different departments and locations.
