PaperCut MF

Partner talk track for mobile and BYOD printing

Give users the freedom to print to any printer, from any device, from anywhere.

	Ask this **question**	Uncover these **problems**	Propose these **solutions**	Highlight these **benefits**
BYOD printing	Do you receive endless support tickets related to printing from BYOD devices like smartphones, laptops, and Chromebooks?	▶ Users struggling to set up and/or print from their own device. ▶ Difficulty catering to users who work remotely or travel between offices. ▶ Difficulty maintaining security while keeping BYOD printing flexible. ▶ Overwhelmed and overworked IT teams.	**Mobility Print:** Let users quickly discover and print to any printer from BYOD and user-managed devices. ▶ Simple user self-setup. ▶ No need to join laptops to a Network Domain. ▶ 100% encrypted and authenticated. ▶ Centrally-managed user accounts. **Print Deploy:** Push the correct print drivers and print queues to roaming users, all automatically.	Native print experience for all users, no matter their device and/or operating system of choice. ▶ Simply hit CTRL+P for tracked printing. ▶ Fits into all networks – simple or complex, big or small. ▶ Reduces support calls to free up IT teams.
Guest printing	Do you want to allow easy printing for users outside your print network?	▶ Difficulty enabling printing for external guests and visitors. ▶ No way to track external print activity.	**Web Print:** Let users print directly from a web browser. **Email to Print:** Let users print by sending jobs to an email address.	Easy printing for users not on site or not connected to the local print network. ▶ Reduces support calls to free up IT teams.
